- Microsoft Visual Studio Code, Github (Intermediate)
- MS Office Suite (Intermediate)
- Power Automate (Beginner)

Work Experience

Help Desk Analyst

CAA Saskatchewan – Regina, SK | Jul 2024 – Present

- Provide Tier 1 technical support via phone, email, and chat, resolving hardware, software, and network issues for 200+ users, reducing average ticket resolution time by 20%.
- Maintain and update internal documentation and knowledge base, improving team efficiency by standardizing 30+ support procedures.
- Collaborate with internal teams on IT and UI improvement projects for internal tools, contributing to 3 successful digital experience enhancements.
- Track, log, and escalate support tickets using ITIL-based processes, achieving a 95% first-call resolution rate on Tier 1 issues.

UX/UI Designer & Design Consultant (Contract)

Chaldal Limited – Remote | Mar 2023 – Feb 2024

- Designed and optimised Chaldal's mobile and web digital experiences, improving user satisfaction scores by 18% through iterative usability testing and qualitative research methods.

- Led redesign of profile, catalog, order, and payment screens using Figma and Adobe Creative Suite, reducing checkout abandonment by 12%.
- Trained 4 interns in UX best practices and design concepts, providing mentorship and consulting skills to build team capacity.
- Participated in project management tasks, coordinating with engineering and stakeholders to align on business requirements and KPIs.

Assistant Director, Product (UX/UI Focus)

Chaldal Limited – Dhaka, Bangladesh | Nov 2020 – Dec 2022

- Oversaw product design lifecycle and collaborated with engineering teams, leading ideation sessions and driving strategic planning across 5+ concurrent projects.
- Created and maintained design systems and style guides, reducing design inconsistencies by 40% and improving team productivity.
- Conducted QA and usability validation pre-deployment, ensuring WCAG compliance and reducing post-launch defects by 25%.
- Led and redesigned the Chaldal App, achieving a 4.2-star user rating and a 30% increase in monthly active users through user-focused design.
- Launched key features including the Geolocation module, contributing to a 15% increase in successful deliveries and measurable KPI improvements.
- Mentored junior designers and built consensus across cross-functional teams, demonstrating leadership and conflict resolution skills.

Teacher's Assistant (Human-Centred Computing)

University of Regina | Sep 2023 – Apr 2024

- Graded assignments and supported 50+ students in HCI and UX evaluation courses, reinforcing qualitative research methods and user experience research principles.
